R&D POLICY

At Bhabani Pigments, we believe in continuous innovation to make manufacturing of our products more cost effective and eco-friendly. We also have programs that focus on continuous product up gradation.

Pilot Plant: All new processes are studied on lab scale, then duplicated on bench scale and changes in operating parameters are verified before finally commercializing them on plant scale.

Visits to Customer Plants: To study their specific requirements and to incorporate changes in our process in order to meet their need.

ENVIRONMENT HEALTH & SAFETY (EHS) POLICY

At Bhabani Pigments, we pride ourselves as a responsible manufacturer and have invested substantially in Environment Management Systems since we consider it our social responsibility to do our best in order to help prevent the degradation of the environment.

The company through its constant endeavors in R&D has developed cleaner technologies owing to which the water consumption has been reduced to less than half of the industrial average. We strongly believe that effluent has to be controlled at its point of generation as opposed to treating massive quantities. In addition, a majority of the treated water from our ETP is recycled back into the plant by using simulated recycle water management systems which are unique to us.

We have installed propriety wet scrubbers and introduced Primary, Secondary and Tertiary treatments of liquid waste which are unique to us. Additionally, we have installed Online 24 hour Data Monitoring Systems which upload real time data to the Central Pollution Control Board (CPCB) Portal in order to ensure that all liquid and air pollution are well within the prescribed norms set by the Board.

All operating decisions in each functional area are made with respect to Safety, Quality and Cost, in that order.

PRODUCT PACKAGING

- Bags
 - ◆ HDPE with double LDPE liners on the inside of 20 kg / 25 kg
 - ◆ Paper bags of 10 kg
 - ◆ Customized Jumbo Bags of 300 kg and 500 kg
- MS Drums, Steel Drums and HDPE Drums
- Wooden and Plastic Palletization with Shrink Wrapping ready for export.
